Investigative journalist and podcaster Mel K. joins Jimmy to explore the hidden influence of international banking cartels, intelligence agencies, and multinational corporations in shaping post-World War II America and undermining national sovereignty. She reveals connections between Wall Street, Swiss banks, and the Dulles brothers, linking these networks to major global events, including COVID and ongoing centralized control efforts.

The two also discuss how legal immunities granted to organizations like the Bank for International Settlements and the World Health Organization have shielded powerful interests from accountability. The conversation emphasizes the urgent need to restore power to the people and challenges the illusion of democratic control as America faces rapid erosion of its freedoms.

“There is always money for war. You never hear political leaders say they can't go to war because the country can't afford it. They claim not to have money for the poor, homeless and hungry, but war? It's never a problem.”
- D. I.
